

Free Virtual Panel Discussion

Prescribed Grazing to Manage Fire Risk

Wednesday, June 16, 2021

1:00 pm to 2:30 pm

With a dry summer looming, California ranchers, researchers and managers explore how prescribed grazing can target weeds and reduce fire risk. Bring your questions to ask the experts at this online event!

Discussion Topics

We will send you pre-recorded videos by June 9th and receive your questions before the panel discussion.

Grazing and Burning in Californian Coastal Rangelands — Dr. James Bartolome

Influence of livestock grazing on production and conservation value of grassland and shrubland

Studying the Effectiveness of Grazing to Reduce Fire Risk — Matthew Shapero

Response of seedbank and soil biology to various burn treatments in current study from Ventura County

Fencing Techniques for Wildlife and Pasture Health — Madeline Milner

How to receive USDA funds for soil conservation and anecdotes on long-term benefits of prescribed grazing

Notes from the Ranch: Preventing Fire by Targeted Grazing — John Austel

Preparations for summer wildfire by targeting road edges and property boundaries at Rancho Jamul
