

San Diego County Community Fire Safe Councils

The “Neighborhood Watch” in Keeping San Diego Fire Safe

Nearly 150 communities throughout CA have created Fire Safe Councils (FSCs) to help protect their homes and neighborhoods from the devastating effects of wildfire. San Diego is home to more Fire Safe Councils than any other County in California, and the list keeps growing! Community Fire Safe Councils have been referred to as the “neighborhood watch” in keeping San Diego fire safe. As grassroots, community-led organizations, they mobilize residents to protect their homes, neighborhoods, and ecosystems from wildfire risk. They know the unique challenges their communities face, and use this knowledge to plan and implement projects such as: maintaining fuel breaks, neighborhood cleanups, fuels reduction projects, and educational outreach events.

The FSC of San Diego County brings together these community FSCs, along with local, state, and federal fire agencies as well as other stakeholders. By working together across the County, we can utilize our combined experience, expertise, and common objectives to ensure our homes, businesses and communities are well-protected from the threats of wildfire.
